Employee earn 1k each month
再就業津貼試行計劃 僱員申請)

Employer save 4k each month
中高齡就業計劃 (僱主申請)

Skills Overview

[DB]
mssql, etl, analysis report

[FRONTEND]
html, js, css

[BACKEND]
php, web server, api, test

[OS]
window, linux

[Software]
anydesk, visual studio, notepad++, excel

[AI]
gai, ai-agent, machine-learning, prompt engineering

Felix Tsoi

Developer

Summary

15+ years of experience in end-to-end system development, specializing in web applications, database architecture, and API design.

- Key Clients Served: LVMH (Luxury Retail), Chow Tai Fook (Jewelry/Finance), Sun Life (Insurance), CFSC (Financial Services), Kaspersky (Cybersecurity) etc
- Developed technical solutions for HK Government-funded initiatives
- Delivered high-scale API solutions across multiple projects
- During high-volume project phases, consistently delivered production-ready database architectures with a weekly turnaround, while simultaneously managing frontend development and system integration tasks.
- Optimized critical ETL pipelines, cutting batch processing time dramatically and ensuring timely delivery of user data.
- Mentored junior developers and established coding standards

Experience

Dot Net Programmer (7hrs)

Blue Sky

2024 – 2026

- I gained one year of solid .NET programming experience at this company, where I became proficient in the full project workflow, including development, testing, and deployment, which greatly strengthened my technical expertise in .NET
- I had a supportive boss who taught me many useful skills.
- I was exposed to new technologies and gained hands-on testing experience.
- I explored online services and experimented with AI tools in a professional context.
- During this period, I focused on both company exposure and **self-learning**.
 - I learned C++ basics to strengthen my testing skills for handling large AI outputs.
 - I studied .NET hotkeys to speed up daily work and explored ways to make code run faster.
 - I practiced LINQ to improve indexing efficiency, since I wanted to go beyond basic SQL.
 - I learned how to use AI tools effectively, rather than building models, but I also explored ANN and CNN concepts and achieved small-scale success in experiments.
- Due to NDA, I cannot share project details, but these experiences strengthened my adaptability and technical growth.

Other Skills

[DB]

excel, mssql, mysql, sqlite

[Backend]

php, c#, php framework, codeigniter, taiwindcss, npm, nodejs, java, c++, python

[Frontend]

js, html, css, jquery, taiwindcss, typescript, vue, bootstrap, scss, react, next.js, angular, cshtml, asp.net

[SERVER]

iis, apache, xampp, nginx, tomcat, lighty, lighttpd

[Remote]

mstsc, anydesk, putty

[IDE]

visual studio, vscode, notepad++, intellij, androidstudio, sublimetext, pycharm

[Design]

mvc, graphql

[Cache]

memcachedb

[Use AI]

prompt engineering (lv2), python, flask, ollama, langchain, chroma, openai, rag

Felix Tsoi

Developer

Experience (cont.)

Senior Programmer

Cymballe limited

2023 – 2024

- **Project: Elder Wellness & Reward Platform**

- Architected a full-stack wellness ecosystem featuring mobile integration and real-time activity tracking.
- Developed a **dynamic tiered reward algorithm** to automate point calculations based on complex user behavior thresholds.
- Built a **secure digital redemption module** handling transactions, balance management, and comprehensive audit logging.
- Designed a **Multi-Level Role-Based Access Control (RBAC)** CMS to manage hierarchical user groups securely.
- Implemented enterprise-grade security features including **data encryption**, automated expiry policies, and SMS notification triggers.

Software Force

Analyst Programmer

2019 – 2023

- **Enterprise Marketing Data Warehouse**

- Architected high-complexity ETL pipelines processing massive marketing datasets within a secure, VPN-isolated internal network.
- Engineered advanced stored procedures exceeding 10,000 lines of code, utilizing nested execution chains to handle intricate business logic far beyond standard API queries.
- Optimized critical nightly batch jobs, reducing runtime from 18+ hours (failing daily) to <5 hours (completed by 6 AM), ensuring 100% data availability for morning executive reporting.
- Balanced synchronous/asynchronous workflows and managed extensive index strategies to maximize database throughput under heavy load.
- Delivered automated Excel reporting modules and resolved complex browser-side rendering issues for web-based dashboards.
- Recognition: Received explicit commendation ("Perfect") from client stakeholders. The project's success led to a unique retention offer where the business owner proposed a financial bonus to prevent resignation, citing the system's critical dependence on my expertise.

Other Skills

[AI Model]

slr, mlr, ann, cnn, forest, tree

[UI tool]

flowchart tool, google doc, colab, figma, wordpress, springboot

[Mobile]

kotlin

[Java Project]

springboot

[Test]

postman

[Version Control]

git, svn

[Deploy Project]

filezilla, winscp, docker, or by-git/by-svn

[Market]

ga, segment, pixel

[Other]

verce, vbs, powershell, batch, outlook, powerpoint, ssrs, taskscheduler, zip

[Other]

3d stuff, unity, vr, webassembly, arduino

Felix Tsoi

Developer

Experience (cont.)

Web Developer

Minwork Ltd.

2013 - 2019

- **Project: Enterprise Casino CMS & Real-Time ETL Engine**
 - Implemented in-memory caching (Memcached/Redis) and optimized database indexing to handle high-concurrency betting data with sub-second latency.
 - Various Casino Game API

Web Developer

Mtouche (HK)

2012 - 2013

- **Project: Japan AV Web**
 - Japan AV Web provides many landing pages to lure energetic men/women to enjoy the monthly service. Also, have some api to do something for their DB.

Web Developer

Wealthbase Creation Ltd

2012 - 2012

- **Project: Russia Delegation Agenda & Booking Portal**
 - Translated professional UI/UX designs into pixel-perfect, responsive layouts.
 - Implemented strict data validation for booking forms and managed CMS content workflows.
 - cross browser layout fixes

Web Developer

UGC Technolog Ltd.

2010 - 2012

- **Project: Facebook Games CMS & Secure File/VPN Portal**
 - Developed within a **300+ staff US enterprise**, collaborating with cross-functional teams (Finance, CS, Consultants).
 - Implemented complex system designs under **senior architectural guidance**, accelerating mastery of enterprise workflows.
 - Engineered robust backend automation using **Shell, Cron, Curl, and Regex** across **multiple synchronized database servers**.
 - Managed critical services including **Email Verification**, virtual economy tracking, and secure file transfer protocols.

Felix Tsoi

Developer

Experience (cont.)

Web Developer

Project: School Management & E-Learning Platform

2009 - 2010

- **Project: School Management & E-Learning Platform**
 - Developed a role-based access control (RBAC) system with secure, distinct portals for Students and Teachers.
 - Engineered an automated grading engine to process online exercises and exams, instantly generating real-time academic rankings and performance reports.
 - Implemented a centralized dashboard for teachers to manage assignments, track student progress, and analyze class-wide performance metrics.

Education

Bachelor of Science (Information Technology)

Swinburne University of Technology

2007 – 2009

Higher Diploma in Web - based Technology

Hong Kong Institute of Vocational Education

2004 – 2007

Form 5

Chiu Chow Association Secondary School

1997 – 2002

Featured Project

Intelligent Game AI Engine (Mobile)

2023

- Architected a high-performance decision-making engine using advanced MSSQL stored procedures to execute complex "forceful search" algorithms for optimal solution finding.
- Optimized backend logic to pre-calculate game states, exporting a minimal 9-file dataset for seamless Android deployment.
- Enabled lightweight client-side execution by shifting 95% of computational heavy-lifting to the database layer, ensuring fast response times on mobile devices.
